Task 1.1p - Grady Ramsay 218257386

Reflection:

As there were no specifics regarding a reflection of max 150 words. I believe I didn't have any issue whilst learning the basics of HTML.

I was able to create a HTML page with at least 5 main HTML tags, such as head, body, headings, paragraphs, an image, a table, and a form.

I added CSS to my html page utilizing inline, internal styles and an external CSS stylesheet, applying style to the contents of the HTML page.

I also had a GitHub account already and had no issue creating a repository as I had made one before.
